

Excellent
moisture sealing?
Why not!

Excellent humidity protection
properties, a ready-to-use film
coating compound

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been developing and producing special powder preparations for film coating, sugar-coating, colouring and tableting, which are used in pharmaceutical products, food and nutritional supplements and cosmetics all over the world. These one-step products minimize and simplify working times for all applications. Easy, fast and reliable!

Product Information AquaPolish® MS

BIOGRUND's one-step film coating system **AquaPolish® MS** provides a protective and fast soluble film on tablets, pellets, granules and capsules.

AquaPolish® MS is a combination of selected film-forming cellulose ethers with plasticizing and colouring additives. The use of hydrophobic excipients gives excellent protection against moisture. The product is designed to improve the coating process and can be applied using conventional or modern coating equipment.

AquaPolish® MS is a homogeneous, dry-milled, powdered compound, developed for the coating of all kinds of solid dosage forms. It is easily soluble and a reproducible high-quality film coating can be guaranteed. Clear, white and coloured preparations can be tailor-made according to customer requirements.

Regulatory and quality aspects: All **AquaPolish® MS** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.
