

Accelerate your
sugar-coating –
sugar-free!
Why not?

Based on Isomalt, an easy-to-use
sugar-coating compound, with
improved drying properties

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been developing and producing special powder preparations for film coating, sugar-coating, colouring and tableting, which are used in pharmaceutical products, food and nutritional supplements and cosmetics all over the world. These one-step products minimize and simplify working times for all applications. Easy, fast and reliable!

Product Information IsuPolish®

BIOGRUND's sugar-coating system **IsuPolish®** provides a sugar-free dragée which has a pure and natural taste. It is suitable for diabetics (because of its low glycemic and low insulinemic response) and its cariostatic properties.

IsuPolish® is a unique, dry milled, homogeneous blend of Isomalt with pigments and additional excipients to speed up the production process.

It is a ready-to-use master batch, developed for the sugar-free sugar-coating of solid dosage forms, such as tablets, granules, chewing gums, nuts, fruits, etc. **IsuPolish®** is easily soluble and a reproducible high-quality sugar-coating is guaranteed. Clear, white and coloured preparations can be tailor-made according to customer requirements.

Because of its short drying cycles **IsuPolish®** accelerates your production. It can be applied by using conventional or modern sugar-coating equipment.

Regulatory and quality aspects: All **IsuPolish®** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products, nutritional supplements, confectionary and other food applications.
